Hello,

Does anybody have any idea about where I could
get a description of Clover mode/protocol? The
more "complete" it is - the better, of course.
I'm going to try to put in on DSP (of course,
if time, skills etc. allow :-)...

Please respond via e-mail.

Downeast Microwave makes a 33 element looper centered at 915 for just
this purpose. I've used them in the past and they work fine. Try
to keep the birds off them, though; big birds bend the loops.

Two each Televideo 910 and 970 models,
as-is, asking $25.00 each, plus UPS
Ground COD shipping. Or $75.00 and
COD shipping takes all, plus spare
keyboard for the 970.
